July 31, 2024

Local Procedures – Modification

Following approval by the IGC Bureau, the Local Procedures have a modification made to section 4.1.1 b. The updated Local Procedures are V4.2 dated the 30 July, 2024 and are on the Championship website (<https://wgc2024uvalde.com/contestants-center/documents-and-downloads/>).

The reason for the change is that in some gliders, two flight computers with embedded AH capability are already installed. This change allows pilots who would like to be able to use their own portable devices as primary or secondary Flight Recorder to do so, but requires all logs to be submitted daily.

Sailplanes with MoP

A reminder for all competitors that are flying a sailplane with a Means of Propulsion (MoP) you must take-off, run your engine and turn in primary and secondary logger files as per Section 5.4.d of Annex A to Section 3 – Gliding.

Scorer Message to Team Captains

Scoring has asked us to share the following message for team captains:

PLEASE HELP US GET IT RIGHT THE FIRST TIME.

When pilots come to their Sailplane Acceptance Check, please bring a usb stick, SD card, or other media with igc files from all of the following:

- Primary logger
- Secondary logger
- Flarm
- Extra logger 1 (see the change to local procedures above)
- Extra logger 2

It's only by having a log file in hand that we absolutely know the manufacturer and serial # of the logger and what its role is (Primary, Secondary, Extra).
